DETAILED ACTION

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1, 2, 4, 6-9, 11, 13, 15, 17, and 19 are rejected under 35 U.S.C. 102(e) as being anticipated by Wong et al (6,585,555). Regarding claims 1, 8, and 15, Wong discloses a ball comprising a core and a cover (col. 2, lines 36-40). The cover includes a thermochromic material that changes color according to the temperature (abstract). Regarding claims 2 and 9, Wong discloses the thermochromic materials suitable for the invention are found in US 4,028,118, Nakasuji et al which is incorporated into the '555, Wong patent (col. 3, lines 40-45). Nakasuji discloses the thermochromic material may include liquid crystals or leuco dye. Regarding claims 4, 11, and 17, the thermochromic section is on the surface of the golf ball or topcoat (abstract). Regarding claims 6, 13, and 19, several colors are permanently displayed while one or more colors change when the temperature changes (col. 2, lines 57-63).

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 7, 12, 14, 18, and 20 are rejected under 35 U.S.C. 103(a) as being unpatentable over Wong et al. The additional cover and/or core layer is an obvious duplication of the first core and cover layers. One of ordinary skill in the art would have included a second core and/or cover layer to increase the durability of the ball.

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1-20 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-18 of U.S. Patent No.

Art Unit: 3711

6,780,127. Although the conflicting claims are not identical, they are not patentably distinct from each other because the present invention and the '127 patent claim golf balls comprising multiple layers and an outer surface comprising a thermochromic material.

A rejection based on double patenting of the "same invention" type finds its support in the language of 35 U.S.C. 101 which states that "whoever invents or discovers any new and useful process ... may obtain a patent therefor ..." (Emphasis added). Thus, the term "same invention," in this context, means an invention drawn to identical subject matter. See *Miller v. Eagle Mfg. Co.*, 151 U.S. 186 (1894); *In re Ockert*, 245 F.2d 467, 114 USPQ 330 (CCPA 1957); and *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970).

A statutory type (35 U.S.C. 101) double patenting rejection can be overcome by canceling or amending the conflicting claims so they are no longer coextensive in scope. The filing of a terminal disclaimer cannot overcome a double patenting rejection based upon 35 U.S.C. 101.

Claims 1-6 and 7 are provisionally rejected under 35 U.S.C. 101 as claiming the same invention as that of claims 12-15 and 17-19 of copending Application No.

10/920,617. This is a provisional double patenting rejection since the conflicting claims have not in fact been patented.
